"The Extravaganza was a life-changing experience for me! The event showcased the big picture. I started to see Herbalife as a company that will grow in the future. I started the business step-by-step. In less than two years I was a proud member of the President's Team and became a Chairman's Club member in 1998." Michiko says, "The most important thing is to share the information with everyone. I've been working to carry out Herbalife's philosophy and its mission to people around the world. Always remember that you are contributing in bringing great products to people's homes and changing their lives. Bringing as many people to attend the Korea Extravaganza in June will definitely be the key to your success!"
