Host (主持)

I was obese from young and suffered from hypertension and hormone imbalance problem in my twenties. I had been taking medication for more than 10 years. Through Herbalife's good nutrition, I improved on my conditions in 3 months and my doctors have taken me off my medication since last quarter of 2007. In addition, I have lost 24 kg. By sharing with people, I made a highest part-time income of \$1,500.00. I decided to quit my job as a Childcare Principal, and do this business full time last November 2008. Thank You Herbalife!!!

Special Guest Speaker (特别讲师)

Before Herbalife, I was suffering from thyroid condition and even had a fibroid operation. Since then my body was weak and I was even addicted to 7 cups of coffee a day to keep myself awake. After taking herbalife purely for weight management, I lost 6 kg in 2 months and was amazed that my energy levels increased tremendously. I use to own a salon and it was so competitive that you could see a salon in 10 footsteps. Eventually I lost money in my business as a result of price war and economic crisis. I moved on to join herbalife by sharing the product to the people whom I know. To my surprise, they will much more willing to spend money on weight management than hair styling, which opened my eyes to the opportunity and I got serious about the business.
